

Welcome

Welcome to web site of The 2003 International Business Information Management Conference. This major international event will be held in Cairo, Egypt from 16 - 18 December 2003. The conference will address a range of important themes with respect to e-business and its impact on organizations. The conference will include numerous paper and workshop presentations by academics and researchers from around the globe.

This is a conference for those who are interested in global business development in the 21st century. All are encouraged to register and attend this major and timely conference. A range of travel, tour and accommodation options are also available.

Conference participants are welcome to submit presentation extended abstracts, paper drafts, or invited session proposals. Please refer to call for papers. Presentations submitted for publication will be fully refereed and published in print and electronic formats. For those unable to attend the conference in person, virtual presentations are available. Virtual presentations allow participants to submit papers for refereeing and publication in the conference proceedings. Virtual participants will receive a full copy of the conference proceedings on a CD.

The phenomenal growth of the Internet has lead businesses around the globe to believe in the promise of utilizing the Internet to conduct business. The 2003 International Business Information Management Conference aims at exploring the role of e-business and its impact on organizations in the 21st century. While the focus is e-business, this conference brings together all business functional areas such as logistics and distributions, marketing, sales, accounting, finance, and management to assess the impact of e-business on these areas and to coordinate efforts among different business functions in transforming organizations. Please refer to conference themes and tracks.
