Call For Papers

Theme: "Fostering Innovation and Excellence in Engineering Education"

The IEEE International Conference on Teaching, Assessment, and Learning for Engineering (TALE) will be held each year in the Asia-Pacific region (IEEE Region 10) beginning in 2012. It is intended to complement existing conferences sponsored by the IEEE Education Society, most notably Frontiers in Education in North America (IEEE Regions 1-7) and EDUCON in Europe/Middle East/Africa (IEEE Region 8). The aim of TALE 2012 is to provide a forum for academicians and professionals from various educational fields and with cross-disciplinary interests to network, share knowledge and engage in dialogue around the theme of fostering innovation and excellence in engineering education. To this end, both research and practice-oriented papers are invited that encompass all aspects of education in the engineering fields (including computing, computer science, information technology and cognate disciplines). The conference will feature traditional paper presentations, workshops, as well as keynotes by renowned educational experts and authorities.

PAPER SUBMISSION, REVIEW, AND PUBLICATION

A blind-review process will be used to evaluate all submitted papers.
