Call for Papers and Conference Themes

The Organizers cordially invites Abstracts and Full Research Papers from all over the world to participate in the World Congress on “Frontiers of Mechanical, Aeronautical and Automobile Engineering” (WCFMAAE– 2013) on the following scientific areas for presentations and discussions thereafter.

The field of mechanical, aeronautical and automobile engineering embraces a broad spectrum of technical activities including several dimensions of engineering along with the classical techniques of work methods, production and quality control as well as safety aspects. It also incorporates the fields of human factors, operational research, manufacturing systems as well as management systems. WCFMAAE–2013 is the premier forum for communication of new frontiers in the fields of mechanical, aeronautical and automobile engineering that will focus on various techniques and applications. The conference covers most of the theoretical and experimental topics and also encourages the submission of critical review articles covering advances in recent research of such fields.

The conference aims at providing an opportunity for exchange of ideas and dissemination of knowledge among Academia, Industry, Research Scholars, Scientists, Entrepreneurs and N.G.O for sharing of knowledge followed by discussion related to frontiers of mechanical, aeronautical and automobile engineering. Contributions are invited from prospective authors from related areas. All contribution should be of high quality, Original and not published elsewhere or submitted for publication. During the review period, Papers will be reviewed by eminent scholars in the respective areas.

Topics of interest for submission include, but are not limited to:
