

Call for Papers

SOLUTIONS FOR A SUSTAINABLE PLANET

You are cordially invited to submit an abstract for the forthcoming SSEE 2009 International Conference.

This International Conference hosted by the Society for Sustainability and Environmental Engineering (SSEE), Engineers Australia, will be held on 23rd-24th November 2009, in Melbourne, Australia. The key theme for the conference is 'Solutions for a Sustainable Planet' – we firmly believe we can move beyond talk and ideas to implementing practical solutions. Engineers and scientists are particularly well placed to achieve this in conjunction with Government, industry and the community.

With an expected audience of more than 400 attendees, the Conference has been designed with an emphasis on engineers and scientists from both Australia and overseas, practising across Government, industry, community and academic sectors.

This Conference will be a forum to reflect the increasing role that engineers and scientists play in delivering sustainable solutions in engineering projects and across a wide range of activities. It will also highlight processes and techniques to simplify the complex nature of implementing sustainability. These issues are highly topical and as such have already attracted a strong support from government, community and industry. Both theoretical and practical aspects of sustainability will be discussed.

A number of key national and international leaders in various facets of sustainability will be addressing the Conference.

There are many complex and varied issues we face on local, national and international scales, and this conference is intended to provide a forum for people to showcase their solutions. This conference will provide a great opportunity for you to present your sustainability project to an appreciative audience, make new contacts and learn new, innovative ideas.

Major areas for the conference:

-  Climate Change and Reducing Greenhouse Emissions
-  Energy Resources and Efficiency
-  Waste Management
-  Green Buildings
-  Education & Professional Development
-  Material Flows and Industrial Ecology
-  Process Engineering & Cleaner Production
-  Sustainability Reporting & Triple Bottom Line Assessment
-  Water Management
-  Transport Infrastructure
-  Urban Planning & Development
-  Environmental Economics & Accounting
-  Community Consultation & Development
-  Governance, Policy & Statutory Processes
-  Innovation & Leadership
-  Aid, Developing Countries and the Millenium Development Goals

Visit the conference website for more information

Following your Conference presentation and subject to peer review, your paper may also be considered for publication in the Journal of the Society for Sustainability and Environmental Engineering, or recommended for consideration in select international journals (eg. SSEE Journal of Environmental Engineering, etc.).

All abstracts will be reviewed. The primary basis upon which decisions to accept or reject abstracts and proposed papers will be the direct relevance to conference themes and objectives. Fundamentally, all abstracts and papers will need to demonstrate their relevance to sustainability within engineering. Based on conference timing and total numbers of presentations available, such as the number of parallel sessions, final abstracts and papers will be accepted and allocated between extended abstracts, non-reviewed papers and peer-reviewed papers.

From the abstract, three types of papers will be accepted for the conference:

Extended Abstracts – Maximum 4 pages. Reviewed by Technical Committee only.

Full Papers – Not peer reviewed – maximum 10 pages.
Papers may be allocated an oral presentation.

Full Papers – Full blind peer review – maximum 10 pages.
Papers will be allocated an oral presentation.

Please submit your 300 word abstract using the Conference Proforma, including the type of paper proposed, by no later than Wednesday 18th February 2009.

Dates

| | |
|------------------|---------------------------------|
| 18 February 2009 | Abstract Submitted |
| 27 March 2009 | Notification of Acceptance |
| 15 May 2009 | Full Paper Submitted for Review |
| 3 July 2009 | Review & Comments Returned |
| 31 July 2009 | Final Paper Submitted |
