thank you

so much for supporting

SITE

From AACE, the Conference organizer: All submissions are peer-reviewed by at least two reviewers, and ideally three reviewers, who are members the conference's international Program Committee of experts in fields specifically matching the conference topics. Papers are subject to a double-blind review. Reviewers are strongly encouraged to provide the author with comments intended to improve the content, style, or other issues to improve the quality of the article.

If the review results are not clear, at least two members of the conference's Program Committee decide whether a paper can be accepted or not, and in which presentation category. A review of all papers receiving high review scores is undertaken by all the members of the Board to nominate outstanding papers.
The acceptance rate for SITE conferences is 25-39%

SITE 2024 PREFACE

It is with great pleasure that we present the proceedings of the Society for Information Technology and Teacher Education 2024 International Conference. SITE brought together a diverse group of educators, researchers, and practitioners from around the world, in Las Vegas, Nevada. SITE 2024 marked the 35th anniversary of the organization and we packed it with fun, engagement, education and celebration!

SITE 2024 welcomed presenters and attendees from 30 countries and 470 institutions and organizations. Our schedule was packed with more than 600 sessions, social events, and networking opportunities. These published proceedings represent the contributions of more than 800 international authors. The conference provided an excellent space for connecting with exciting ideas as well as the most dynamic and thoughtful thinkers and practitioners in our field.

As always, SITE featured a wide range of sessions, including a record number of workshops, research presentations, keynote talks, newcomer welcomes, posters, and invited panels on a variety of areas related to technology and teacher education. In addition, attendees had the opportunity to network with peers and engage in social events. We hope you will continue staying connected in the coming months through involvement with one or more Special Interest Groups – we have more than 30 active SIGs related to teacher education and information technology, which are free to join and keep our converstaions about key content areas going after conference ends.

I would like to extend my sincere thanks to the Councils, SIGs, SITE executive committee and program chairs, past presidents, editors, and the entire AACE team for their support and contributions – each person helps to make each SITE conference a success and ensure that it is the highlight of our academic year!

Finally, thank you to all of the participants who attended the conference and shared their research, ideas, and expertise. It is through your contributions that SITE continues to be a leading forum for the exchange of knowledge and innovation in the field of technology and teacher education. We hope that the proceedings of the SITE 2023 conference will serve as a valuable resource for educators, researchers, and practitioners for years to come.

We look forward to seeing you at our online SITE Interactive event later this year, and at our regular conference next year in Orlando – mark your calendars for March 17-21, 2025!
